

Definition of Done

Definition of Done for Features:

1. Code for Components has been written.
 - a. The code does comply to the naming conventions of the used programming language
 - b. Code has been completed
 - c. Unclear code parts are provided with a short comment, to explain what this part is supposed to do.
2. Developers submit a screenshots of the finished feature as a comment to the related issue
3. Feature has been reviewed by another team member
4. Feature has been merged and closed

Definition of Done for Sprint Release:

1. Finished issues are marked as done
2. Code is tested and deployed
3. A short demo is available for each sprint (this is compliant with point 3 in DoD for Feature) so it can be the screenshots or a small video or even a short-live presentation 😊
4. Bill of Material is kept in a current state

Definition of Done for Project Releases:

1. Team agrees on which features to be released
2. Features have been tested and reviewed by other team member
3. Documentations are kept updated
4. A short demo featuring major features is provided
